
Adobedreamweaveroldversionfreedownload

I upgraded my computers and lost my old installation for the Adobe Dreamweaver CS5.5 file. I can't find a place to download it from the Adobe site. Does anyone know where I can download the latest Dreamweaver CS5.5 file? I don't want to use the latest Community Edition or CS5.5 because I only need Dreamweaver Import from CS4. I don't mind if I have multiple files to import, but I would like them to be the same size. I don't want all the files needed for import to be updated every day, so I only want to update the one I need.

Thank you
