
BackRex Expert Backup [32/64bit]

After making any changes or installing/uninstalling any applications, your computer is left with outdated data and settings. ReBackup Data Rescue is a professional data recovery software that will recover your deleted files, multimedia files, emails, contact lists, address books, calendars, docs, pictures, videos, music, and text messages. The utility can recover files lost by accident or by the removal of their recovery partition. The program can also restore files that are corrupted. It also fixes partition problems that occurred due to corruption, partition misalignment, user modification or addition of system files, and accidental deletion or format partition. It helps to retrieve files from a disk that has got bad sectors, from a corrupted external hard drive, or even from a CD/DVD disk. There is no hidden feature that can harm your computer's performance. ReBackup Data Rescue scans the entire hard disk and finds the lost data in a second. The program does not waste time waiting for a specific location in a partition to be scanned. Once the program finds the files, it creates exact copies of the lost data. Note: If you are using a program that you don't want to be interrupted while you are working, you should close it before launching ReBackup Data Rescue. If the program crashes while it is retrieving your data, you may have to contact the application's manufacturer. What's new in version 2.0: · This is a new version of ReBackup Data Rescue, which has several new improvements and bug fixes. The application now supports Windows 7/8 and comes with many new features. Key Features: · Recover deleted files, photos, videos, music, and documents in three simple steps: Scan, Recover, and Check. · The program quickly recovers all your data, without any file errors. It is highly recommended to use a separate media for each folder (e.g. a CD or DVD) to avoid overwriting the same data more than once. · Supports more than 35 file formats. It supports all major file extensions, including Microsoft Word, Excel, PowerPoint, PDF, JPEG, TIFF, GIF, BMP, PNG, etc. · Can save recovered data on a local hard disk, external hard drive, memory card, CD/DVD, and many other devices. It also allows you to save recovered data in RAR, ZIP, TAR, and other archive formats. · Supports the latest Windows operating systems, including Windows 7,

What's New in the BackRex Expert Backup?
