Portable music2pc aims to assist you in searching for music on the Internet and downloading audio streams to your computer. With a bit of help from this application, you can create a complete collection of your favorite songs and enjoy them from the comfort of your desktop PC. Portable music2pc offers you access to a variate and immense track selection, enabling you to download MP3 files at high speed. Designed to meet the requirements of both beginners and tech-savvy users, it features a user-friendly interface that doesn't require much experience to get accustomed with. The search can be performed either by artist name or the song title and the found items are displayed in an organized manner, enabling you to view the track duration and its bitrate. There are two available search providers that generate different search results, but whatever you choose, the number of downloadable items is not disappointing. In order to save a file on your hard disk, all that is left to do is configure the location of the download directory and press the designated button. Our tests revealed high download speeds, since it just takes a few seconds to grab a song. Furthermore, multiple download tasks can be run simultaneously, without affecting the resource usage. Portable music2pc can easily find songs of all genres, from hip-hop, R'n'B, house to religious or classical. Moreover, it can search for various versions of a song, namely live, cover or instrumental. The downloaded files can be then transferred to any player or compatible handheld device and enjoyed at home or on the go. Proxy support, portability, multi-thread downloading and high speed makes Portable music2pc a great tool for getting the MP3 files you want. On the downside, it does not display the source of the downloaded files, so it is advisable that you have a reliable security solution during usage, just to be on the safe side of things.
