* KEYMACRO - The worlds first macro recorder. * Record your keyboard and mouse actions and replay them when needed. * Record hotkeys, mouse clicks, and cut/copy/paste commands with just a few mouse clicks. * Use it for practicing your keyboard and mouse skills, capturing game play sequences, making screencasts or tutorials, *...or show off your mad skillz to your friends. Reviews WinKiwi News How to Use The best way to record a hotkey, or mouse click or cut/copy/paste command is to use the keyboard recorder. All you have to do is press the hotkey, mouse click, or cut/copy/paste command. If the hotkey or mouse click is being used for some other purpose like a web browser page field, the program will automatically delete the hotkey, mouse click or cut/copy/paste command from the clipboard. You can then continue working without any further interference. The hotkey, mouse click or cut/copy/paste command can then be re-used later. If you want to record a macro for a program or a function, such as for instance a script or a function in a software application, then click on Macro. In the Macro recording screen, type in the hotkey, mouse click or cut/copy/paste command. The macro is then recorded. When you have finished recording, click on Stop. The recorded macro is then displayed in the Macro recording window. You can use this macro by double clicking on it or simply by pressing the hotkey, mouse click or cut/copy/paste command. The hotkey, mouse click or cut/copy/paste command can then be re-used later. If you want to record a keyboard macro, click on Keyboard Macro. The Macro recording screen will then be displayed. Type in the hotkey, mouse click or cut/copy/paste command. The macro is then recorded. When you have finished recording, click on Stop. The recorded macro is then displayed in the Macro recording window. You can use this macro

1. Field of the Invention The present invention relates to an image pickup apparatus and a method of controlling the image pickup apparatus. 2. Description of the Related Art The following description sets forth the inventor's knowledge of related art and problems therein and should not be construed as an admission of knowledge in the prior art. Digital image pickup apparatuses include digital cameras, digital camcorders, and so on. Some digital image pickup apparatuses, for example, digital video cameras have a function of playing back a movie recorded while recording still images taken while the movie is recorded. The above-described digital image pickup apparatus having such a function (referred to as a movie playback function) is connected to a television set (television receiver), for example, and images picked up while recording the movie are displayed on the television set. In the above-described digital image pickup apparatus having the movie playback function, however, the user has to set the digital image pickup apparatus for playback when recording a movie. This results in a problem that the usability is not good. To address the problem, there has been proposed an image pickup apparatus that controls the playback timing of a movie recorded on a storage medium on the basis of a playback position in an image pick-up operation performed when recording the movie (refer to Japanese Unexamined Patent Publication No. 2004-350536). In addition, there has been proposed an image pickup apparatus that controls the playback timing of a movie recorded on a storage medium on the basis of a playback position in an image pick-up operation performed when recording the movie while a movie is playing back (refer to Japanese Unexamined Patent Publication No. 2007-272584). In the image
