□ 7.2/10 □ Elden Ring is a fresh take on an old series. It manages to be both nostalgic and novelistic, with a vibrant art style that feels fresh. Going for a more hack and slash approach is a great decision, and though the game has its flaws, the rich lore and characters provided by a detailed story and a more interactive combat system make the game more than worth the time that it takes to finally play. 7.8/10 □ Good game, and a unique one at that. The combat is fun, the characters are well drawn, and the gameplay works surprisingly well for a game in which enemies attack and you have to use your guard to block. What's not to like? Oh yeah, the voice acting. It's pretty bad. 8.0/10 □ Elden Ring is a fresh take on an old series. It manages to be both nostalgic and novelistic, with a vibrant art style that feels fresh. Q: Bivariate Normal Derivation I'm trying to derive the pdf of bivariate normal distribution. Here is what I have found. I define a vector  $\mathbf{z}$  such that  $\mathbf{z} = \begin{bmatrix} x \\ y \end{bmatrix} = \begin{bmatrix} X \\ Y \end{bmatrix} - \begin{bmatrix} \mu_1 \\ \mu_2 \end{bmatrix}$ , where  $\begin{bmatrix} \mu_1 \\ \mu_2 \end{bmatrix}$  and  $\begin{bmatrix} \mu_1 \\ \mu_2 \end{bmatrix}$  are the mean and covariance vectors of the distribution  $N(\mu_1, \mu_2)$  and  $N(\mu_1, \mu_2)$ , respectively. Then I was trying to find the pdf  $f(\mathbf{z})$  for  $N(\mu_1, \mu_2)$ .  $f(\mathbf{z}) = f(x - \mu_1, y - \mu_2) = f(x, y) = \frac{1}{\sigma} \exp \frac{1}{\sigma}$

BERLIN (Reuters) - A German court on Tuesday reversed a decision to deport an Iranian woman who had sought asylum in the country while her husband - a German national - was serving a life sentence for the murder of a policeman. The ruling, by the highest court in the state of Lower Saxony, threw into question Germany's "one-stop-center" system for asylum seekers, which has faced criticism as the number of applications has soared, with several asylum seekers convicted of serious crimes. The center in question is known as "Wettinge," after a boy who drowned in a police swimming pool while fleeing from street gangs in the 1990s. Vahid Katouzian, a Kurdish German national, was sentenced to life imprisonment in 2011 after being convicted of killing police sergeant Hans-Jochen Heinrich. Katouzian, 35, had sought asylum in Germany and remained free but was ordered by a lower court to be deported after the Lower Saxony court rejected his claim. Katouzian's lawyers argued at a hearing on Tuesday that he was entitled to seek asylum because his deportation would place him at risk. The Federal Office for Migration (BAMF) said it opposed the appeal, and referred to a report it had commissioned on the case. The agency said it had reviewed the report and concluded that Katouzian, who could not be reached for comment, was likely to be subject to serious human rights violations if deported. Judge Loretta Nyswander ruled that Katouzian's requests for asylum could not be ignored. "I am forced to conclude that Vahid Katouzian is not a flight risk," she said. "He is not only implicated in criminal proceedings but is
