The L1 trigger demands a Level-1 trigger for a single collision, which produces enough information to reconstruct tracks from the SiW vertices. The Level-2 trigger requires a global event (GEV) and selects events that are interesting to follow. The Level-3 trigger has, for some events, the required information as well as the number of reconstructed vertices. The fifth and final level is for use in experiments that are using neutrino beams. Characterisation of the mechanism of potent and selective class II PI3K α inhibitors from a new class of isoform selective molecule in the presence of lung cancer tumor cells. Class II isoform of phosphoinositide 3-kinase (PI3K α) is
