Download: Double Dhamaal. 3.4M downloads · Dus to download movies 0 seconds.. Double Dhamaal Full Movie (2007) 7.5M.Q: Sqlite - Update when duplicate exists I have an sqlite database that has many tables that need to be updated at the same time. The problem I'm having is that some columns in one of the tables have duplicate values that I need to update. If I just update all at once, it will update the the wrong value as duplicate values exist.

I can't use alter table as I can't update the primary key as the values are already set in another table. What I am trying to do is to update a column in a table where the column has duplicate values and the same column in the same table has the value NULL. I am guessing that would be the only way to get this to work. Below are my select statements, is there a way to do this? The column names and table names are all being generated by a loop in a python script that creates the script from a database.

```
UPDATE [MyTable] SET [MyID] = CASE WHEN EXISTS  
(SELECT [MyID] FROM [MyTable] WHERE [MyID] = 'TEST'  
 ) THEN [MyID] + '1' 6d1f23a050
```
