banjo kazooie's success was partly because of the development team. after banjo kazooie was released, the team behind the game went on to form lionhead studios, now known as microsoft game studios, where they developed several successful games, such as the popular fable series and the highly-acclaimed black & white. banjo kazooie is a side-scrolling platformer in which players must help the main characters rescue 24 animals. unlike the games of the 90's, however, it featured cooperative play, allowing the player to play as banjo and kazooie simultaneously, as well as online multiplayer, which was a new feature for the nintendo 64. banjo kazooie is primarily a platformer. it features a number of elements unique to the game. for one thing, banjo and kazooie, the protagonists, have the ability to run at high speeds by jumping. because the game is played on a side-scrolling basis, the environment is always visible, unlike the case with side-scrollers such as donkey kong country or super mario 64, where the player is in a darkened environment, and must make their way through by inspecting the environment. the game also features a distinctive art style, with its bright colors and bold lines. finally, the game is centered around the concept of a "collect-a-thon", where the player must collect a variety of powerups to get to the next level. each collectable item serves a purpose in the game. for example, eggs can be used to break open crates; the golden feathers can be used to add health; and the red feathers can be used to open note doors, which lead to new areas of the game.
